U. S. Department of Agriculture

SPRING TRADE LIST OF "MODERN MUMS FOR 1952."

Once again we are pleased to be able to offer the new University of Nebraska Mums to the trade. As before they have been tested at many points throughout the northern half of the country in addition to years of testing by Mr. Glenn Viehmeyer, their creator, at the North Platte Sub Experiment Station of the University of Nebraska. We, therefore, have no compunctions in advocating their wide usage. In addition to the new Nebraska mums, our list is comprised of the newest offerings from the other leading hybridizers. It is for this reason we title our lists "MODERN MUMS".

1952 UNIVERSITY OF NEBR. INTRODUCTIONS

ARAPAHOE (NP 143) Huge flowers (3-5" in diameter without disbudding) are produced in clusters of 3-5 blooms on long stems from husky 36" plants. The color is a rich red with a reddish bronze reverse. Petals are long and strap-like with slight waviness which give them an informal appearance. Arapahoe is extremely frost resistant, having withstood repeated freezes as low as 25 to 29 degrees without significant damage to flowers, buds or foliage. A continual bloomer from mid-September on.

Rooted Cuttings \$22.00 per 100, Strong banded plants \$3.50 per 10, \$27.00 per 100 LESHARA (NP 146) Heavily branched husky 30" plants are covered with sprays of five to twenty five fully double 2-3" flowers from early Sept. until heavy frosts. Color on opening is mulberry red shading on age to a softer red with lovely old rose overtones. The second color phase is very attractive, one which is especially liked by the ladies. The flowers and buds are, like those of Arapahoe, very frost tolerant, having withstood many exposures to temperatures ranging from 25 to 31 degrees with no more than an occasional damaged petal.

Rooted Cuttings \$20.00 per 100, Strong banded plants \$3.25 per 10, \$25.00 per 100.

1951 UNIVERSITY OF NEBR. INTRODUCTIONS

OSCEOLA - Long stemmed three inch flowers of bright yellow during early blooming season which take on coppery hues with the arrival of cool weather. An excellent out flower from mid-August until killing frosts.

TECUMSEH - A superior cushion mum. Compact 12-15" plants covered with 1-1/2 to 2" flowers. Color is an erythrite red changing to buff bronze with pink shadings during hot weather. Blooms from early August until heavy freezes.

WHITE CLOUD - A new white mum which we consider far superior to Avalanche in all respects. Fully double 3-5" flowers made up of sharply pointed petals which are pure white on outside of flowers while undeveloped inner petals and buds show cream tints. Blooms from mid-August until heavy frosts. Withstands several exposures to sub-freezing temperatures each fall without damage which is unusual for whites. IMPORTANT - Do not confuse this variety with another one bearing the same name which has been in commerce for many years.

Rooted Cuttings \$12.00 per 100, Strong banded plants \$2.15 per 10, \$18.00 per 100.

GENERAL LISTING OF MODERN MUMS

Rooted Cuttings-Banded Plants Per 100 Per 10 Per 100 *ANDREW (Becker 1951) One of the finest new ones of the past season. Three inch flowers of soft red with ashes \$2.50 of roses overtones. Fine for cutting. October 1st. *APRICOT SPOON (Lehman) Tubes of apricot bronze, spoons of \$13.00 1.50 \$ 7.50 apricot rose. Very frost tolerant. Late Sept. ASHES OF ROSES (Wayside 1950) Rare blend of iridescent shades of old rose with salmon apricot overtones. 18.00 12.00 2.15 Mid September AUTUMN ROSE (Wayside 1951) Blend of coral, rose and 2.15 18.00 jasper red with soft buff overtones. Late Sept. 12.00 AZTEC GOLD (Kraus 1951) Large very frost resistant double 16.00 1.85 10.00 lemon yellow flowers. Late Sept. *CANARY WONDER (Bristol 1951) Lovely canary yellow sport of 20.00 White Wonder. Excellent long stems for cutting. Late Sept. ---2.50 *CARMINE QUEEN (De Petris 1950) The best red pompon. Nicely 16.00 1.85 10.00 shaped tall plant, fine for cutting. Mid October. *CECII. BEED (Wallie's Gdns 1950) The finest large early pink. Bright rose pink flowers. Sept. 1st. Quantity very limited ---18.00 2.15 CODY (Viehmeyer) One of the best cushions. Grows but 10" tall and up to 40" across. Flowers vary from white with lavender 13.00 eages in July to glistening violet in cool weather. 1.50 7.50 *DAWNROSE (Kraus) Large double flowers of grenadin pink to 14.00 8.50 1.65 bittersweet pink. Early October. DREAM GIRL (Floralane) Long stemmed pompons of deep lavender. 14.00 8.50 1.65 Excellent for cutting. Early October. * SEE "INSTRUCTIONS BOD CEDTER"

CROIL - 1rog stranged three inch filmers of bright willow laring ourly bioceing nurcon which halv on coppers hims with this increase.

In an effort to control disease and insect infestation our plants are propagated from parent stock carefully selected in the field and also are treated with Selenate and Fermate while being grown in the greenhouse. The banded plants will be grown and shipped in the new Bird "Vita-Band-D" bands which allow one to plant in the field with-out removing. A slight pressure at planting time breaks the band allowing the roots to expand and grow.
